

**HIGHWAYS BETTERING THE ECONOMY AND ENVIRONMENT POLLINATOR PROTECTION ACT
H.R. 2738**

Introduced by Reps. Alcee L. Hastings (D-FL) and Jeff Denham (R-CA)

The undersigned support H.R. 2738, the Highways Bettering the Economy and Environment Pollinator Protection Act (Highways BEE Act).

Pollinators, such as honey bees and native pollinators, birds, bats, and butterflies, are essential to healthy ecosystems and are vital partners in American agriculture. Honey bees, monarch butterflies and other native pollinators are suffering drastic population losses, due in part to loss of habitat.

Highway right-of-ways (ROWs) managed by State Departments of Transportation (State DOTs) represent about 17 million acres of opportunity where significant economic and conservation/environmental benefits can be achieved through integrated vegetation management (IVM) practices, that can—

- Significantly reduce mowing and maintenance costs for State DOTs, and
- Help create habitat, forage and migratory corridors that will contribute to the health of honey bees, monarch butterflies and other native pollinators, as well as ground nesting birds and other small wildlife.

Neighboring agricultural lands and wildlife ecosystems will benefit through improved pollination services.

The Highways BEE Act directs the Secretary of Transportation to use *existing* authorities, programs and funding to encourage and facilitate IVM and pollinator habitat efforts by *willing* State DOTs and other transportation ROWs managers, building on innovative IVM efforts in a growing number of State DOTs.

National Organizations & Businesses Signed On to Date:

**Pollinator Partnership
American Beekeeping Federation
American Farmland Trust
American Forests
American Honey Producers Association
American Horticulture Industry Association (AmericanHort)
American Seed Trade Association
American Society of Landscape Architects
